## Environmental Policy

---

HDD Servo Motor AB shall reduce their environmental impacts as far as ecologically motivated, technically feasible and economically reasonable.

We do this by:

- Identify and follow the environmental laws that affect our business.
- Primarily working with suppliers that have a pronounced environmental ambition.
- Take care of our waste in an environmentally sound way.
- Primarily buy green products.
- In-house development design products with long life and low energy consumption.
- Increase our knowledge and commitment to environmental issues that affect us.

We will continuously improve our operations through our routine descriptions and goals.

This policy is reassessed annually after new environmental review is done.
